

Venture Company certified

ISO certification

European CE certification

Patent Certification

Reliable company with No. 1 in customer satisfaction rating.

KOREA AUTO DOOR

www.koreadoor.com

Strong Business Partner Auto Door System

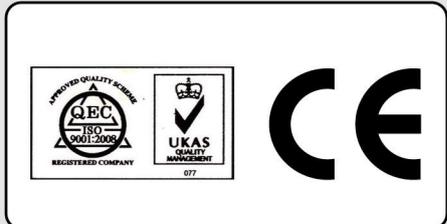

Korea Auto Door

No.1 market share in Korean automatic door segment.

- Quite & stylish design.
- Developed & manufactured its own controllers.

Improved production cost & capacity using automated production line.

Nationwide Branch Operations
 Head office
 Gyeonggi branch / Busan branch
 Daegu branch / Grangju branch
 Youngnam factory / Honam factory
 Ensure thorough follow-up

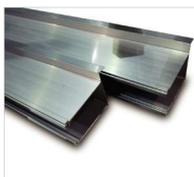

- ISO 9001:2008 Certified.
- Venture Company certified.
- Automatic door industry's first European CE certification.

Korean industry leader KAD

Advanced technology & in-house manufacturing.

High-strength double extruded aluminum material
 Applied water resistant & corrosion-resistant aluminum coating to prevent the corrosion.

Round frame structure
 Dust resistant round frame design to minimize the dust build up.

Brush guide rail
 Sealed structure by adding brush to prevent the foreign objects such as dust & insects from entering.

Insect-proof sheet
 Apply screen door during the summer season to prevent insects from entering. Designed for smooth air ventilation while preventing rodents from entering.

Apply a transparent sheet
 maximize the visibility for inside/outside of the work areas.

Print Logo
 Able to put printed advertisement logo or material.

SPEED DOOR - KAD Series

SPEED DOOR Series_Standard Model

KAD-2000

The basic automatic door in high speed automatic door market.

Widely used model driven by good performance, functionality & reasonable price. Easy installation and fast opening / closing. Maintain the inside temperature - Energy saving effect. Good for high traffic locations with frequent truck, forklift & other transportation vehicles.

Partly sheet replaceable
Able to replace sectional sheet which can minimize the maintenance cost.

SPEED DOOR Series_ Automatic Recovery Model

KAD-3000

Designed to minimize the damages & repair cost from outside impact. In the event of broke/derail caused by a vehicle, you can restore the door to its original state by raising the door to all the way up and lower it down.

Automatic recovery function
This process will automatically fix the problem.

SPEED DOOR Series_High Speed Model

KAD-4000

3 meter/second. Dual rail structure. Designed to minimize the wear & friction - created gap between steel and rail.

Cycloidal speed reducer
Durable, long-lasting, economical, light-weight. Compact-size & low noise.

High speed system
Uses In-House developed High Speed System which has permanent lifecycle.

SPEED DOOR Series_Slim Model

KAD-2000S

Built-in Motor Speed Door. Guaranty low noise & high speed operation. Designed to isolate the motor from foreign objects and moisture. Able to install at a small space.

Motor built in design
Protects motor from external environment such as dust and water with motor built-in.

SPEED DOOR Series_ Hotel Parking Lot Automatic Door

KAD-2000M

Provide a great solution for hotel which is trying to differentiate against their competitors. Replacement of parking lot automatic door itself can result in a great remodeling effect.

LED mounted.
Colorful exterior design by installing LED lights.

Printing logo.
Designed to place logo and/or print materials on the sheet (replaceable).

SPEED DOOR Series_ Automatic Door at Car Washer

KAD-2000G

You can operate car washer all the time for 24 hours for 365 days and you can run car washer conveniently by building unmanned system linking with car washer.

Protect Car Wash Equipment
Operates at freezing temperature of -20 degree.

Minimize the noise level in Car Wash application
Effective soundproof, waterproof & dustproof resulted by distinguished tight seal design.

Installed with high performance sensor to maximize the speed door performance

Linking with sensor

01 ULTRASONIC SENSOR
 Ultrasonic sensor (human, distinguish objects detection)

02 TOUCH SWITCH
 Touch Switch (Worker manually switch)

03 INFRARED SENSOR
 Infrared sensor (detects moving objects)

04 PHOTO SENSOR
 Photo Sensor (Safety Sensor)

05 LOOP SENSOR
 Digital Inductive Loop sensor (detects vehicles, forklifts)

Linking with automation equipments

01 KAD-2000A
 Integrated air curtain

02 KAD-2000C
 Integrated clean room

03 KAD-2000G
 Car wash integrated type

04 KAD-2000L
 Lift integrated type

05 KAD-2000B
 Conveyor linking type

06 KAD-Series
 Bidirectional dual opening control

07 KAD-Series
 2-step opening control

08 KAD-Series
 Security System Integration

To guarantee the quality of Korean Automatic Door.
